WE have been much surprised to receive a lawyer's letter demanding on behalf of the Host, F. H. MAY, Captain Superintendent of Police, an apology for the publication in our issue of Friday of the defence offered by Inspector STANTON to the charge preferred against him, on the ground that such publication constitutes a libel on the hon. gentleman. While expressing regret that anything that has appeared in our columns. should have caused Mr. MAY annoyance we has been provided for them. cannot admit that the publication of the document in question constitutes a liber or exceeds the legitimate rights of a newspaper. The document is a public one, addressed as we understand, by Inspector STANTON to Mr. MAY himself, and it has presumably been transmitted by the latter to H.E. the Governor and will in due time no doubt be published, with the other papers in connection with the recent scandal, in a parlinmentary blue book. Its publication in our columns at the present time may be deemed p.emature from an official point of view, but not, we venture to think, by the public. Inspector Stanton may or may not be guilty; of that we have had publicly disgraced he is entitled to publish

his defence and make himself heard at the | the country, as required, the rails in rear being | witnessed the accident, sprang from the deck bur of public opinion. The public would have a poor opinion of the fairness or stores is moved on. As moutional before, the sailor. This, says the N. C. Daily News, was courage of a newspaper that declined to afford him facilities for such publication for fear of offending his accuser and judge. The statement contains nothing which Inspector STANTON would not have been entitled to urge had he been tried publicly before a jury in the Supreme Court. Whether he would have done himself any good by adopting such a line of defence is another question, but the jury would have had to consider it in connection with the other circumstances of the case.

That the publication was made by our selves without any animus towards Mr. May is evident from an article which appeared in the same issue in which we said :- " In the recent cases the Captain "Superintendent had the assistance of the "Crown Solicitor in his investigations;" "and no one would dream of doubting the desire of these two officers to be impartial or their ability to sift evidence."

The high opinion in which we hold Mr.

May is quite compatible with the opinion

that the powers he has been called upon to exercise in connection with the recent trials to any one man, however conscientious or however able, and when the matter comes to the notice of the Secretary of State, and, as it probably will, to be discussed in Parlinment, it can bardly be doubted that those powers will be largely curtailed and that the position of an Inspector of Police in Hongkong will be rendered at least as secure as that of a sergeant in the army, who can only be reduced in rank on the verdict of a Garrison Court Martial; on which their officers, who, drew horse allowance, an no officer of his own regiment is allowed to sit, or that of a Sanitary Inspector in the playees a special allowance for the next four Hongkong Civil Service, who is entitled to months up to the end of the year, and the quesbe tried by the Executive Council. pare the proceedings in the recent case of Sergeant FETTER, of the West Yorkshire be made according to the salaries drawn by the Regiment, with those against the Police Inspectors. Sergeant FETTER, when charged with receiving an illegal gratification in his enpacity of Canteon Sergoant, had an open allowed to retain the able assistance complaints received from passengers of the of Mr. J. J. FRANCIS, Q.C., who cross discomfort and inconvenience caused by the Regiment at the time. Inspector Hore, of receive these animals in future. No dogs will, whole funncial question, the Sanitary Department, when charged therefore, be conveyed in the Company's

trial before a Court composed of officers of other cotps than his own, and he was examined the officer commanding the in connection with the bribery scandal, had the benefit of a trial by the Excentive Council. The Police Inspectors, on the other hand, have had no trial by an independent will be glad to learn that it has thus grappled tribunal and no legal assistance, but have firmly with the annoyance caused to the pean tried in secret by their own superior dogs in the steamers, and that on and after it is said, been abendoned; and it now seems officer, who was plea their accuser, Sept. 15 these animals will no longer be con- certain that Sir Erelyn Wood will succeed to and who was granted the assistance veyed in the Paned O. books. There are the post, as he is entitled to do by the rules. Shanghar a Hongkong had written to Shang. of the Crown Solicitor. If the men are superiored at the action of the Duke of Commany it might succeed Sir Shanghai replied on the Board of the Duke of Commany it might succeed Sir Shanghai replied on the Board of the Duke of Commany it might succeed Sir Shanghai replied on the Board of the Duke of Commany it might succeed Sir Shanghai replied on the Board of the Duke of Commany it is present to Commany in the Pard O Company but there is no doubt master General. gullry I nowledge and for a guilty purpose we do not hesitate to describe the publish ment inflicted as excessive. Thus justice has not been quite even would appear from the fact that no distinction has been made in the punishment of the man convicted of baying received bribes and that of those convicted of simple neglect of duty. But whatever arguments may be advanced for or against the gravity of the offence, the mon have been publicly disgraced and we hold that they are entitled to be publicly heard in their own vindication. Important as it is that corruption should be rooted out of the Public Service it is not less important that justice should be administered with all reasonable precautions against its possible miscarriage.

> A dreadful explosion took place on the 18th August on a steam launch at Muring Phrom, a day and a half's journey from Bangkok. The steam launch was a Siamese vessel and had only recently had a now-boiler put in. There were about twenty people on board at the time. of whom ten were missing altogether after the explosion and six were not expected to recover, The result was completely destroyed. She was owned and run by Prince Chairat, who had his wife and child on board with him. The Prince and his wife were both thrown on to a floating house by the force of the explosion and died in a very short time. Their child was picked up at some distance and has recovered. The new treaty between Mothers' and Japan COAL MINE CONCESSIONS IN THE edition days

> The coal beds in the letand of Cabu known we the Uling and Lutar mines will be offered by the Philippine Government at public motion on the 22nd January 1898, under a special conconsion for 99 years, upon terms which must be considered favourable and which are published in the Gaceta de Manila of 22nd July, 189? We translate the principal conditions laid down

The Company bidding must have a minimum capital of \$350,000, of which at least two-thirds shall be paid up, and it is required to make guarantse deposit with Government of 2 per cent, may \$7,000, the basis of production being a minimum of 36,000 tons a year, of which Government requires one half at a reduction upon the current market price of the day of delivery of similar coal, the extent of this reduction forming the basis of sale, for instance, 15 cents a ton off market price will be preferred to 10

The Company shall pay the Government 15 tents of a dollar per ton on all coal extracted co defray expenses of periodical inspection of the mines, the Company being at liberty to provide its own skilled and unskilled labour for working the mines and railway without any official, intervontion, or interference by the authorities, beyond the usual police service for the preserva-

tion of order. A railway six to eight miles in length will have to be built from the mines to the port of Tinane, on the east coast of Ce , where a jetty will be put up for vessels to load at. The mines of Uling and Latae, though apparently separate concessions, are to all intents and purposes one and the same, and they can be worked simultaneously, or only one at a time, Uling being the more important, and should it alone be worked at first Lutae need not be, unless at the convenience of the Company, but if not begun within ten years of the formation of the Company the delay would involve a cancelation of the concession to that extent.

Should any unforeseen accident in the workng of the mines take place, such as to render impossible the production of the minimum quantity required by the contract, namely, one handred tons per working day, the Government may modify its terms in conformity with the opinion of the inspecting engineer and as may be warranted by circumstances. Samples of Philippine coal can how be seen in Hongkong, we understand, and we hear that a small cargo will be sent over here shortly to introduce it to consumers. It will take come little time to get mines in working order for large supplies, but looking at the present prices being paid for Japan and other qualities there should be a certain market for all the Philippines can produce, and at an exchange that gives fully eleven dollars to the pound sterling, English capital will certainly be attracted to this hitherto nnexplored but

> FATAL BOATINA ACCIDENT AT YOKUHAMA.

On Sunday afternoon, 22nd August, five Portuguese residents of Yokohama, Messra. V. F. Barrados, E. Perpetue, B. Fernandez, Da. Roza, and a young nephew of Mr. Barrados, together with a seaman from the U.S. flagship Olympia hired a small rowing boat, without keel or centre board, from a Chinaman-Ab Tesk on the Crockeido and went out for a sail to Honmoku. Before they had gone far outside the barbour the boat was very nearly capsized in a pull of wind, which was blowing very qually at the time. Fernandez and the young lad, Mr. Barrados' nephew, very shortly after this mishap, were landed, and went home jiaricksha, the others continuing their mil. On the way back a much more serious secident befell the company. Soon after leaving the neighbourhood of Honmoku, between o'clock and half past, the boat ran nose in under the choppy seas, and was gradually swamped, turning turtle immediately afterwards. four occupants of the boat were thrown into the water, some distance from the shore. Smith, the Olympia man, and Da Roza struck out for shore and were picked up by a passing Japanese; boat and landed, but Barrados and Perpetue were not seen to rise. The body of the latter was recovered by the Water Police on Sunday night, but that of Barrados has not yet been found .- Japan Mail.

THE CHAMBER OF COMMERCO AND THE EXCHANGE

We have received the following minutes and correspondence for publication— At a special meeting of the General Committee of the Hongkong General Chamber of Com-morse held at agen on Friday, the fird September-Present, Mesars R. M. Gray Chair man) Herbert Smith (Vice-Chairman), J. J. Boll-Irving, T. Jackson, N. A. Sieba, Whitehead and R. C. Wilcox (Secretary)called to consider what action should be taken on a letter received from the Singapore Chamber of Commerce, dated 26th August. The letter, which stated that the Singapore Committee had under consideration the question whether the Government should be approached many shares were thrown on the market with the object of devising some means of and had to be sold at rainous rates. Although obtnining fixity of explange, and whether it some trouble was experienced over the August might not be possible for the Hongtong Cham. settlements some accounts not coming forward, ber to work together with them in moving for the settlements, taken as a whole, went off better some remedy for the wile brought on by the that anticipated, and immidiately afterwards very heavy decline in aliver, was read.

The Chairman said at was gratifying that the Singapere Chamber Mould have consulted them. in this matter, as it showed a desire on their part to work in unison with Hongkong, which could not fail in the long run to result in the common good, but the question at issue appeared to him beset by more than ordinary difficulties. for them and he feared was impracticable for

The matter was then discussed at som length, and it was decided to reply that, in view of the very different positions occupied by the two colonies. Hongkong being situated on the borders of the Chinese Empire, with which its trade is mainly conducted and whose currency is silver, any change was impracticable; and the Chamber did not therefore contemplate taking any notion in recommending to the Government any change in the existing ourrency.

The Railways Administration intend to make a broad | R10.000. Ten days even allowed for the road through their own property leading from the station to the North House Road in a southeasterly direction, and the Municipal Council will probably widen the North Honan Road where practicable, but the approaches to this road from other parts of the Settlement are not good. There is no bridge over the Soochow Creek, in fact, that is sufficient for the traffic that now exists except the Garden bridge, and that is by no means all that it should be. The Szechuen Bond bridge is very much overburdened as it is, because the largest share of the heavy goods traffic by wheelbarrows, trucks and bamboo coolies to and from Rongkew passes over it, owing to a municipal regulation that prohibits such traffic passing over the Garden bridge. The Honan Road bridge is not a desirable one for carriages es the gradient is too steep, and besides this the opproach by the Honan Road is narrow and The Manaraja of Kutch Behar has taken overgrowded. It would be possible though relentary service at Malikhand difficult, for the Council to extend the North Shape, the North Fukien and the North Cheking Roads to the station site, but even if this were done in any one instance it would only serve for native truffic in a large measure. owing to the locality of those roads, A root epproach to the station might be made by extending the North Szechnen Ruad through

traffic in the Szechuen Rout and over the Szechuen Road bridge While on this subject it is appropriate to remark that when the railway is completed there will be no road at all to the new Rifle Range, but we understand that the Municipal Council has requested the Bullway Administration to build a small station plose to the entrance to the Range, and that the application has been favourably considered, so that it is nearly certain that our Volunteers will have one means of reaching the Range that will be expeditious and convenient

to the old Rifle Range, and muking that into

a new road direct to the station, but there would

always remain the difficulty of the congested

As previously stated, when the line is opened for local traffic only a small portion of the Shanghai station site will be made use of but yet it is intended to build a station-house suftidently commodious for the purpose, and not without architectural merits, though it will only be a temperally erection. We are given to understand that regulations conforming passengers, such as prevail on the continent, will be strictly enforced, and that no exception will forts. be made in favour of Chinese officials or their retinges. If this is really carrie out it will be greatly to the credit of the Railway Administration, and will certainly must with the arproval of foreigners. But we regret to say that a mistake is about to be made in another direction, for there are to be only two classes of carriages, first and second, and we may presume that the latter will be largely used by the native trading class who have business with shipping at Woosung, while there would certainly be a vost number of the coolie class travelling by the line if facilities were given them, and for such a third oldes nught to be provided.

The line was surveyed and hid out by Mi H. Hildebrand, the Engineer-in Chief, assisted by his brother Mr. P. Hildebrand, who is the resident Engineer in charge, his assistants being Messrs. Unglaube and Rutenberg - N. U. Daily Crimata Straits.

No. 68, PRAYA. POWERFUL PLANT OF STEAM LAUNDRY MACHINERY. Makers -Manlove, Alliot & Co. and Thomas Bradford & Co. It has only been a short time in use, and has been well cared for it is as good as new and would be very suitable for a Pablic Laundry, where a large amount of washing is to be done. All this Machinery combined makes a very powerful washing plant, and is supposed to wash, dry and floish about 5,000 pieces of clothes per day. They are fitted with two of Washington Lyon's Patent Steam Disinfectors, so that whilst the washing process is going on, with a pressure of 20 lbs. of steam they produce a temperature of 260 deg, which destroys the germs of all disease and all forms of insect life, and at the same time the most delicate colours and fabrics in silk, wooling, or cotton materials are not in the least affected or damaged by this process disinfeeling and weshing For Price and Particulars, apply to
